

1980 Monza Roller, 4-Link, Strut Style front!!!

Posted by BigBalls - 22 Aug 2012 07:53

This is a nice roller that comes with everything except the motor and trani. It is set up for a SBC and a Glide or Turbo 350, I have the Hooker headers, all electronics, air shifter, Currently Certified to 8.50, has fuel system, Fiberglass doors and front clip, Weld Draglites all around with new front tires and worn out 14x32s on rear with lots more room, it is a 12-bolt with good axels, 4.88s and a Spool, 4-Link rear with anti roll control, strut style front with tubular control arms, rack and pinion, removeable wheel, etc. This is a super light weight car that would FLY with any motor! The car does need a little work to go Racing but could be done and running in a couple days with no problem! Asking \$4500 Or Best Reasonable Offer! No good offer Refused! If interested or for pics Please call or text Chuck at 585-944-0842 Thanks
