NOS FOGGER Posted by ten5abody - 07 Dec 2011 21:10
This is a USED NOS brand Fogger set up with soft plume nozzles. The lines are bent for a std port big block Mopar. I have everything for the engine, NO feed line, bottle or brackets. Included, but not pictured, is the line and fitting to connect the two fuel solenoids. The jets in the picture are all I have, and one 36 jet is missing. \$350
