

A FEW MORE PARTS.....

Posted by ten5abody - 27 Aug 2012 09:44

SB Mopar 727. This was behind a street/strip 360 that went 10.80's. Dynamic forward pattern manual valve body and A&A internals. It came with my Valiant when I bought it, but I switched to a BB and can't use it. \$350 FIRM.

1976 Mopar 400 block, standard bore but needs a sleeve due to rust pitting. Hot tanked, magged and sonic checked by Competition Wedge. \$50

5lbs. NOS nitrous bottle with high flow valve \$75

3 1/2" bullet style mufflers. Not sure what brand they are because they came on a car I bought. Body measures 18 1/2" \$20/pr

One M/T racing tube, was in a 27" slick \$10
