

Weld draglite wheels

Posted by 64fatblock - 21 Dec 2013 16:29

Weld draglite wheels. 15x3.5 and 15x8 with 5.5bs, 5-lug Ford and Chevy bolt pattern. The rears are correct backspacing for 79-93 Mustangs and drilled for slicks. Include center caps for front wheels. Rears are painted with Hammered black, fronts are still un-painted but was going to paint them to match. Rears could be stripped back to natural. \$375
