

11 second pump gas 440 \$1,500

Posted by ten5abody - 10 Jul 2011 08:33

Selling the 440 from my Valiant. Ran 11.50's all day on 93 octane through mufflers at 3,310lbs. Driven to and from track. It will run on 87 octane, but I only raced it once like that. It went 11.90's in another car on 87. I built this 5 years ago, but only used it 3 summers.

NO INTAKE OR CARB! Everything else goes.....

906 heads by Arlie Brown, unported, milled to 80cc

MP 296*/.557" solid cam

Erson rockers

9.0:1 compression

resized rods with new bolts when built

polished crank, std/std

Moroso 7 qt pan, will thow in stock baffled pan if wanted

Melling HV pump

electronic dist

I do have an Edelbrock Performer intake I will sell with it for an extra \$100.

This crank DOES NOT have a provision for a pilot bushing for a 4 speed!
