

WTB Bald Tires for Mockup

Posted by jakedog - 05 Aug 2011 11:38

Hey, Looking for a set of 315/60R15 radials or slicks of the size for mocking up a truck.

Cheaper the better, as long as they can hold air, if they need a patch or plug it dont matter I wont be running them , like I said just for a mock up !

You can email me direct jetmail333@gmail.com

Thanks
