

350 sbc .030 decked w/Trickflow rods & pistons

Posted by originalmingia - 16 May 2012 23:39

1973 high nickle 4 bolt fresh out of Farmer Automotive in Webster, NY. 5.7 inch trick flow rods. Stock style bushed rods. Mild LT-1 style domes and flat tops. Stock steel crank cut .020 on rods and .030 on mains. Both sets of rods are bushed for floating pins and have ultra light pins. So to recap, block, crank, 2 sets of rods, two sets of pistons, tool steel wrist pins, \$600 worth of fresh machine work, all for \$500 firm. Call or text Tony @ 585-719-5118. I'll be at the track on Sunday the 20th and can bring the parts for inspection/purchase. I can text pics too, if you'd like.....
