

MORE PARTS!

Posted by ten5abody - 15 Jun 2012 07:42

Brand new, still in the box, Autometer Sport Comp 2 5/8" mechanical temp gauge, PN 3432. \$50

Used pair of South Side Machine traction bars. These have a shock bracket welded onto the back of them for use with an axle that has a back brace. It can easily be cut off if you don't need it. \$30

Used fuel cell foam for a 10 gallon cell, 17x17 \$5

BB Mopar CVR electric water pump and aluminum 440 Source housing. The housing is the 73 and newer style. If you're putting a BB in a car that had a SB, this housing will allow you to keep the SB radiator. This set up cost \$310 new, I'll take \$200.
