Update:

Got ahold of the specific info on the cylinder heads - they are All-Pro 220 cnc'd - 58cc chambers - they have been rolled to 18 degree - the Brodix HV1 intake was spec'd to match - flow numbers were spec'd at .700 lift with 28" of water - 318.75 intake 257.85 exhaust (they have been freshened at least once since then - and may have been shaved at that time)

Block casting number is GM 3951509 for those who have asked
