

MOPAR 727

Posted by ten5abody - 17 Mar 2013 17:04

Small block Mopar 727 built with A&A and Dynamic parts with a forward manual valve body and deep pan. Was in my Valiant running 10.80's with a 360 and driven on the street as well. No issues at all, just don't need it because I switched the car to a big block.

If you need a BB 727, I have a bare BB case you could swap the internals into.

\$350 for the trans or \$400 with the BB case.
