

1969 300HP 350 and TH350

Posted by ten5abody - 10 May 2013 14:35

1969 Chevy 300HP 350 and date matching TH350 with 76K miles on them. Both were built the 3rd week of November 1968. The block is a 4 bolt and the heads are 041 castings. They are still in the car and running. The engine currently has a Holley carb and aftermarket dual point distributor. I do have the correct 1969 350/AT Quadrajet carb for it, but it needs to be rebuilt. The engine also has a new fuel and water pump on it.

Great engine and trans for a stocker or a restoration. \$1,200 for both.
