

Brodix BBC heads

Posted by td1332 - 08 Oct 2013 11:11

Brodix 18 degree heads complete with chrome valve covers, jesel 1.8 rockers and all titanium valves that were brand new in the beginning of the season. All head work was done by Scott Duggins at PAR this heads work very well and make good power. On 632 it run mid to low 4.4s and 6.9 to 7.0s on motor in dragster and have been 6.5-6.6 on 1 stage of spray. These are the heads that were on my dragster when I won the Norwalk national event in TD.
