

Dragster wheels & tranny

Posted by hatchetman337 - 27 Sep 2011 18:20

I'm selling my front dragster wheels and a tranny. The wheels are Bogarts, not sure on the model name, but they are a decent and light wheel. They are in decent shape with a scuff on one of them. They come with a set of tires that I put on brand new 50 passes ago. Asking \$450 OBO for the rims/tires.

The tranny is a 180 straight cut glide made for a dragster. It was rebuilt by Tim Roberts and has 50 passes since then. I have had zero problems with it. It has a pro brake and a JW case with a JW Ultrabell still in cert. Turbo spline. Asking for \$2500 OBO. I do need this till the end of the season, but that's only a couple weeks away.

Call or text Bob Belvick at 315-264-3850, email at ibob337@gmail.com , or see me at the track. I drive a blueish purple dragster with silver flames, #1341
